Introducing Frontline's online program management system!

Based on his D.I.A.L. Approach to Positive Youth Development, David created the PeerPositive System to help organizations develop their students into effective peer leaders. While youth organizations generally provide a wealth of valuable services, this web-based tool enables them to effectively integrate their various program components and provides a method for incentivizing responsible behavior. In addition to a user-friendly system of program management, rank, and evaluation, the PeerPositive System utilizes innovative online resources and the power of **positive peer pressure** to prepare youth to engage, equip, and empower their peers.

Features:

Progress Tracker: When it comes to youth development, **you get what you MEASURE!** Program Advisors can easily track attendance, log community service hours, evaluate program participation, run reports and more, with a few simple clicks of a button.

Dashboards: Students can log onto their own personalized dashboard to check their performance, complete assignments and interact with the rest of their team. **Support NETwork** members also have 24hr. access to their student's dashboard.
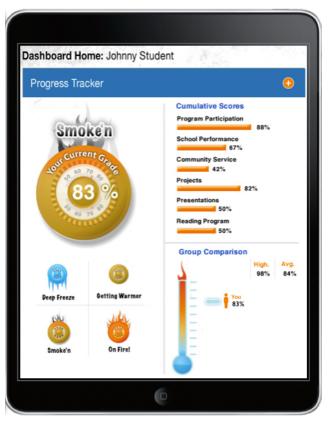

Service Learning Center: Students can interact online to develop projects and presentations with our step-by-step planning guides.

Quiz and Assignment Builders: Easily create and grade quizzes and assignments customized to fit the specific needs of your program.

Resource Center: Upload your own program specific documents and media that can be easily accessed by the entire group.

Set-up Wizard, Tutorials & Forms: Everything you need to get your group up and running in minutes!
